175 AVIATION, AIRLINES, AIRPORTS, DRONES & AEROSPACE PARTNER TARGETS

Airlines • Airports • Air Traffic/Safety • Drones • Helicopters • Private Aviation • Aircraft • Avionics • Aviation Schools • Ground Services • Cargo • Associations

Purpose: Give Student Fellows a dedicated aviation prospecting system spanning commercial sponsorship, travel support, STEM, engineering, airport operations, logistics, pilot/maintenance careers, drones and aviation education. Aviation can support the Student Impact Challenge through **cash, airfare, experiences, speakers, technology, scholarships, awareness and career exposure**.

Important distinction: Government aviation agencies and public authorities should generally be approached through official education, public-affairs or community-outreach channels—not with the same sponsorship pitch used for commercial airlines or corporations. No fellow may promise flights, airport secure-area access, drone operations, travel awards or aviation experiences without leadership approval and all required safety, eligibility, insurance and permission checks.
