STUDENT FELLOW DAILY OPERATING SYSTEM & PERFORMANCE SCORECARD

A Practical Workday System for Prospecting, Outreach, Follow-Up, CRM Discipline and Partnership Development

Purpose: Turn the sponsorship training library into a repeatable daily and weekly operating system. Fellows should always know what to work on, how to prioritize it, how to record it and how performance will be evaluated.

THE PERFORMANCE PRINCIPLE

We do not reward activity for activity's sake. Sending 100 weak emails is not better than sending 25 researched, personalized messages that create qualified conversations. Fellows are measured on quality, consistency, pipeline movement, CRM accuracy and results - not email volume alone.

1. RECOMMENDED DAILY WORKFLOW

Time	Block	What Happens
9:00-9:20	Pipeline Review	Check replies, today's follow-ups, meetings, overdue tasks, proposal status and urgent leadership items.
9:20-10:30	Prospect Research	Research assigned organizations, identify decision-makers, verify contact information and determine fit/ask.
10:30-12:00	Personalized Outreach	Send researched first-touch emails/messages using the correct category strategy.
12:00-1:00	Break / Admin	Lunch plus urgent administrative items as directed.
1:00-2:00	Phone / LinkedIn Follow-Up	Work previously contacted prospects that have not responded; use approved follow-up process.
2:00-3:00	Active Opportunities	Handle replies, schedule meetings, send requested approved materials and advance qualified prospects.
3:00-4:00	New Pipeline Development	Build and prepare tomorrow's prospect queue; fill research gaps.
4:00-4:30	CRM Cleanup	Log every material email, call, reply, status change, meeting, ask and next action.
4:30-5:00	Daily Scorecard	Record outputs, results, blockers, lessons and tomorrow's priorities.

2. MORNING PIPELINE REVIEW - FIRST 20 MINUTES

- Open the CRM before starting new research.
- Review all replies received since the previous workday.
- Identify every follow-up due today or overdue.
- Check today's meetings and preparation requirements.
- Check proposals requested, sent or awaiting leadership review.
- Escalate serious sponsor interest, contracts, legal/tax questions, major in-kind offers or unapproved benefit requests.
- Choose the day's Top 3 outcomes before beginning new work.

3. DAILY ACTIVITY TARGETS - QUALITY FIRST

Metric	Daily Guide	Quality Standard
Qualified prospects researched	10-15	Organization, fit, correct department/contact target and ask are documented.
Personalized first-touch outreach	15-25	Quality messages; no blind mass blast.
Follow-ups completed	15-25	Only prospects due for follow-up under the approved sequence.
Phone / LinkedIn attempts	10-15	Targeted attempts where appropriate; log outcome.
Decision-makers reached	Track	Measure actual contact with relevant people.
Positive responses	Track	Interest, referral, information request, meeting interest or proposal discussion.
Meetings booked	Track	Qualified meetings, not calendar padding.
Proposals requested / advanced	Track	Movement toward a real partnership decision.
CRM accuracy	100%	Every material interaction and next step recorded.
Cash pipeline created	\$	Potential value of qualified opportunities - not confirmed revenue.
In-kind pipeline created	\$ / units	Track separately from cash; verify valuation when possible.
Confirmed cash	\$	Only after confirmation standard is met.
Confirmed in-kind	\$ / units	Only confirmed contribution; separate from cash.

Management note: These are operating guides, not quotas that justify low-quality outreach. Managers may adjust targets by assignment, prospect complexity, meeting load and campaign stage.

4. WHAT COUNTS AS A QUALIFIED PROSPECT?

Test	Required Standard
Organization Fit	There is a credible connection to youth, education, community, STEM, careers, products, prizes, media, funding or another approved program need.
Contact Fit	The fellow has identified the correct department or a plausible decision-maker/contact pathway.
Ask Fit	The proposed cash/in-kind/strategic ask makes sense for that organization.
Evidence	Research comes from reliable current sources; no invented contact or giving information.
CRM Ready	Organization, source, category, contact target, ask, priority and next action are recorded.

5. OUTREACH QUALITY SCORE - 10 POINTS

Factor	Score	Standard
Correct contact / department	0-2	2 = verified/relevant; 1 = plausible; 0 = generic/poor fit.
Personalization	0-2	2 = specific organizational fit; 1 = light; 0 = copy-paste generic.
Ask relevance	0-2	2 = strong fit; 1 = broad; 0 = inappropriate/random.
Clarity & professionalism	0-2	2 = concise/clean; 1 = needs improvement; 0 = confusing/error-heavy.
CRM / next step	0-2	2 = complete; 1 = partial; 0 = missing.

Target: Average outreach quality score should remain 8/10 or higher. If quality falls, reduce volume and coach the process.

6. DAILY SCORECARD TEMPLATE

Field	Daily Entry
Date	_____
Fellow	_____
Top 3 outcomes planned	1. _____ 2. _____ 3. _____
Qualified prospects researched	_____
First-touch outreach sent	_____
Follow-ups completed	_____
Phone / LinkedIn attempts	_____
Positive responses	_____
Decision-makers reached	_____
Meetings booked	_____
Proposals requested / advanced	_____
Qualified cash pipeline added	\$ _____
Qualified in-kind pipeline added	\$ _____ / _____ units
Confirmed cash	\$ _____
Confirmed in-kind	\$ _____ / _____ units
CRM complete?	YES / NO
Biggest win	_____
Biggest blocker	_____
Leadership help needed	_____
Tomorrow's Top 3	1. _____ 2. _____ 3. _____

7. FRIDAY WEEKLY REPORT

Weekly Section	What to Report
Pipeline	New qualified prospects + active opportunities.
Outreach	First touches, follow-ups and calls/LinkedIn attempts.
Response	Positive responses, referrals and decision-makers reached.
Meetings	Booked, held and next steps.
Proposals	Requested, drafted, sent and under review.
Cash Pipeline	Qualified potential value; separate from confirmed.
In-Kind Pipeline	Potential products/services/media/travel/etc.; separate from cash.
Confirmed Support	Confirmed cash and in-kind separately.
Quality	Average outreach quality score + CRM accuracy.
Wins	Top 3 meaningful accomplishments.
Problems	Top blockers, bad data, objections or process issues.
Next Week	Top 5 priority organizations/opportunities and actions.

8. WEEKLY PERFORMANCE SCORE - 100 POINTS

Category	Points	What Management Evaluates
Research & Qualification	15	Quality and relevance of new prospects.
Outreach Quality	20	Personalization, contact fit, ask fit and professionalism.
Follow-Up Discipline	10	Due follow-ups completed correctly and on time.
CRM Accuracy	15	Complete, accurate records and next actions.
Pipeline Movement	15	Decision-makers, positive responses, meetings and proposals advanced.
Results	15	Qualified/confirmed cash and in-kind progress, weighted for stage and quality.
Team / Professionalism	10	Reliability, preparation, communication, learning and escalation.

9. GREEN / YELLOW / RED MANAGEMENT DASHBOARD

Status	Score	Meaning	Action
GREEN	85-100	Strong quality, disciplined CRM, pipeline moving and professional execution.	Maintain; give more responsibility.
YELLOW	70-84	Some good work but inconsistency, weak conversion, quality gaps or CRM problems.	Coach specific weaknesses; review next week.
RED	Below 70	Persistent quality, discipline, accuracy, professionalism or performance problems.	Manager intervention; reduce independent outreach if needed.

10. DO NOT GAME THE SCORECARD

- Do not send low-quality messages simply to increase volume.
- Do not create duplicate prospects to inflate research totals.
- Do not classify generic replies as positive responses.
- Do not count a calendar invite as a qualified meeting unless the prospect is relevant and engaged.
- Do not count a proposal that was never requested/qualified as pipeline progress.
- Do not call potential pipeline 'confirmed support.'
- Do not inflate in-kind values.
- Do not skip CRM logging because an activity seems small.
- Do not contact the same organization through multiple fellows without coordination.
- Do not use personal relationships or private contact data outside approved processes.

11. PIPELINE STAGE WEIGHTING

Stage	Strength	Meaning
Prospect Researched	Early	Qualified but not yet contacted.
Contacted	Early	First outreach completed.
Engaged	Developing	Relevant human response / referral / discussion.
Meeting	Qualified	Meeting booked/held with relevant contact.
Proposal Requested	Strong	Prospect asks for a defined proposal.
Proposal Under Review	Strong	Real ask being evaluated internally.
Intent / Approval Process	Very Strong	Specific support discussed subject to final approval.
Confirmed	Closed	Required confirmation standard completed.

12. MANAGER'S WEEKLY 20-MINUTE 1:1

- 5 minutes - fellow summarizes wins and blockers.
- 5 minutes - review pipeline movement and quality metrics.
- 5 minutes - inspect 2-3 actual outreach examples and CRM records.

- 3 minutes - identify one skill to improve next week.
- 2 minutes - agree on Top 5 priority opportunities and any leadership escalations.

13. AI MAY HELP - BUT THE FELLOW OWNS THE WORK

AI can help research public information, draft personalized messages, summarize notes, prepare follow-ups and organize weekly reports. The fellow must verify facts, protect private information, follow approved outreach rules and ensure the final communication is accurate. AI output is a draft, not authority.

14. END-OF-DAY STANDARD

A fellow should never finish the day with important work living only in memory, a notebook or an inbox. By the end of the day, every material prospect should have a current stage, last action, next action, next date and owner in the CRM.

15. THE OPERATING MINDSET

The goal is not to look busy. The goal is to create professional conversations that become partnerships capable of helping students and communities. Research carefully. Communicate professionally. Follow up consistently. Record everything. Learn from results. Improve every week.
