

STUDENT IMPACT CHALLENGE (S.I.C.) CORPORATE SPONSORSHIP PROSPECTUS

HELP BUILD THE NEXT GENERATION OF PROBLEM-SOLVERS.

Corporate Partnership Opportunities • Education • Entrepreneurship • Workforce • Technology • Community Impact

\$100,000+ IN SCHOLARSHIPS, CASH & PRIZES

Students do not just learn about problems. They go into their communities, engage real businesses, identify real challenges and develop solutions.

Presented and operated by TrendCatch Gives Back Inc., a 501(c)(3) nonprofit organization.

Founded by Frantz Coutard | FrantzCoutard.com | Info@frantzcoutard.com

1. THE VISION

The Student Impact Challenge is built around a simple belief: young people become stronger problem-solvers when they are given meaningful opportunities to engage the real world. Rather than limiting learning to hypothetical exercises, the Challenge invites students to explore their communities, speak with businesses and community stakeholders, identify problems and develop practical solutions.

The experience is designed to strengthen confidence, communication, leadership, entrepreneurship and future-ready thinking while encouraging students to see themselves as people capable of improving the places where they live.

LEAVE IT BETTER THAN YOU FOUND IT.

2. THE BIG IDEA

A student can learn about entrepreneurship in a classroom. The Challenge asks the student to speak with an entrepreneur. A student can read about community problems. The Challenge asks the student to identify one. A student can be taught critical thinking. The Challenge gives the student something real to think critically about.

That shift—from passive learning to active problem-solving—is the heart of the Student Impact Challenge.

3. WHAT STUDENTS DO

Stage	Student Experience
REGISTER	Enter through the approved program process and complete required permissions.
EXPLORE	Look at the businesses, organizations and needs within their communities.
INTERVIEW	Engage businesses/community voices and learn about real challenges.
IDENTIFY	Select meaningful problems worth understanding and solving.
CREATE	Develop practical ideas, recommendations or solutions.
SUBMIT	Communicate the work through the approved submission format.
JUDGING	Eligible submissions are evaluated under the Challenge's rules and rubric.
RECOGNITION	Winners and participants can be recognized through approved program opportunities.

4. WHAT THE EXPERIENCE CAN BUILD

Capability	How the Challenge Supports It
Leadership	Taking initiative, listening and becoming accountable for an idea.
Communication	Speaking with adults, asking questions and presenting thinking clearly.
Entrepreneurship	Understanding how businesses work and how value is created.
Problem-Solving	Moving from observation to analysis to a proposed solution.
Confidence	Learning that a student's voice and ideas can matter.
Workforce Readiness	Professional interaction, research, teamwork and presentation skills.
AI & Digital Readiness	Using modern tools responsibly to research, organize and communicate.
Financial Understanding	Exposure to business economics, money decisions and community commerce.
Community Awareness	Seeing local needs, assets and opportunities with greater clarity.

5. A BROADER ECOSYSTEM

The Challenge is designed around more than the individual student. Teachers can encourage and guide participation. Schools can become hubs for student engagement. Businesses and community organizations can help students understand real-world problems. Independent judges can evaluate eligible work. Corporate partners can contribute expertise, experiences and resources.

Stakeholder	Role
Students	Explore, interview, solve, create and present.
Teachers	Encourage participation and support student learning.
Schools	Build a culture of problem-solving and student opportunity.
Businesses	Give students real-world context through approved engagement.
Communities	Become the environment in which problems and possibilities are discovered.
Judges	Evaluate eligible submissions using approved criteria.
Corporate Partners	Help expand opportunity, expertise, experiences and program resources.

6. \$100,000+ IN SCHOLARSHIPS, CASH & PRIZES

The Challenge is being developed with more than \$100,000 in scholarships, cash and prizes across approved program award categories. Corporate support can help strengthen the opportunity available to students and the broader ecosystem supporting their participation.

Award amounts, eligibility, judging and distribution remain governed by the official Challenge rules and approved program materials.

7. WHY CORPORATE PARTNERS MATTER

The strongest corporate partnerships can do more than provide funding. A company can bring subject-matter expertise, employee mentors, career exposure, technology, educational resources, experiences and industry knowledge into a structured student opportunity.

That creates a partnership model where the company's involvement is connected to what it actually knows and does.

8. INDUSTRY PARTNERSHIP THEMES

Sector	Potential Alignment
Financial Services	Financial capability • entrepreneurship • digital commerce • economic mobility.
Technology & AI	Responsible AI • STEM • digital skills • innovation • future workforce.
Healthcare	Healthcare careers • STEM/science • workforce pathways • community education.
Airlines / Travel	Aviation careers • hospitality • workforce • approved student experiences.
Insurance	Financial resilience • risk awareness • careers • community preparedness.
Retail / Consumer	Community • families • local commerce • workforce • experiential activation.
Professional Services	Mentoring • business skills • consulting thinking • career readiness.
Media / Entertainment	Storytelling • creativity • communications • media careers.
Automotive / Mobility	Engineering • transportation • mobility careers • safety education.
Energy / Sustainability	STEM • clean energy • sustainability • resilience • future careers.

9. EMPLOYEE ENGAGEMENT

Depending on the partnership and program rules, corporate employees may participate as mentors, speakers, judges, volunteers or subject-matter experts. Companies may also help create approved career conversations, workplace exposure, workshops and other educational experiences.

Any engagement involving minors must follow applicable program safety, supervision, privacy and consent requirements.

10. CORPORATE PARTNERSHIP LEVELS

Partnership	Investment	Architecture
Community Impact Partner	\$25,000	Targeted program/community support with approved recognition and activation.
Supporting Impact Partner	\$50,000	Expanded support, defined activation and meaningful corporate engagement.
Major Impact Partner	\$100,000	Defined major program component, employee engagement and impact reporting.
Leadership Impact Partner	\$150,000	Substantial customized initiative, activation, recognition and reporting.
Founding Impact Partner	\$250,000+	Flagship/multi-component partnership with high-value strategic engagement.

Partnerships are customizable. The final scope, benefits, activation and measurement should be developed around program needs, the sponsor's priorities and what can responsibly be delivered.

11. WHAT CORPORATE SUPPORT CAN ENABLE

- Student scholarships and approved awards.
- Participation and program-access infrastructure.
- Career-readiness and workforce experiences.
- Entrepreneurship and financial-capability education.
- AI, STEM and digital-skills programming.
- Community problem-solving experiences.
- Teacher and school engagement.
- Finalist and winner experiences.
- Measurement, reporting and program delivery.
- Technology, staffing, communications and other approved operational needs.

12. EXAMPLE CUSTOM PARTNERSHIPS

Partner Type	Illustrative Initiative	Potential Focus
Technology Company	Future Problem-Solvers & AI Skills Initiative	Responsible AI, digital skills, employee experts and future-workforce exposure.
Bank / Payments Company	Young Entrepreneurs & Financial Capability Initiative	Financial education, entrepreneurship, mentors and economic opportunity.
Healthcare System	Future Healthcare Problem-Solvers Initiative	Healthcare careers, STEM exposure and community-health learning.
Airline	Future Aviation & Workforce Opportunity Initiative	Aviation careers, workforce education and approved experiential opportunities.
Consumer Brand	Community & Local Business Problem-Solvers Initiative	Community activation, local commerce, workforce skills and family opportunity.

13. MEASURING IMPACT

Major partnerships should begin with agreed measurement. Depending on the activation and available systems, reporting may include verified participation, project/submission activity, schools or communities represented, sponsored-event attendance, career exposure, employee engagement, awards distributed, program-controlled digital engagement and approved qualitative stories.

We will not promise metrics that cannot be reliably tracked. The strongest impact report is credible, useful and connected to the actual partnership.

14. SPONSOR RECOGNITION & ACTIVATION

Potential benefits may include approved name/logo recognition, educational thought leadership, employee engagement, community activation, program-generated content, event participation and impact reporting. Every final package should specify exact deliverables rather than relying on vague or unlimited benefit language.

15. RESPONSIBLE PARTNERSHIP STANDARDS

- Student and family privacy are not sponsorship benefits.
- Direct engagement with minors must follow program rules and safeguards.
- Independent editorial/media coverage is never guaranteed.
- Participation and impact numbers must be accurate and supportable.
- Cash and in-kind contributions are documented separately.
- Exclusivity, naming rights and special legal terms require approval.
- Corporate involvement does not determine Challenge winners.

16. ABOUT THE FOUNDER

Frantz Coutard founded the Student Impact Challenge around a larger philosophy: communities become stronger when people are encouraged to create, solve problems and leave the places around them better than they found them.

His work spans entrepreneurship, technology innovation and community-focused initiatives. Through the Challenge, the goal is to give young people an opportunity to practice the type of thinking, communication and initiative that can shape their future.

LEAVE IT BETTER THAN YOU FOUND IT.

17. ABOUT THE ORGANIZATION

TrendCatch Gives Back Inc. is a 501(c)(3) nonprofit organization that presents and operates the Student Impact Challenge.

Corporate partners considering a significant commitment may request appropriate organizational, program, compliance and due-diligence information through the sponsorship team.

18. BECOME A CORPORATE IMPACT PARTNER

A partnership can begin with a simple conversation: What does your company care about? What expertise can it bring? What kind of student opportunity would be meaningful? And what could we build together that produces measurable impact?

HELP BUILD THE NEXT GENERATION OF PROBLEM-SOLVERS.
